

ANSI A14.7-2011 UNDER TRUCKER LADDER

Our new **Under Trucker Ladder** gives you easy access to your trailer. Compatible with most dry box trailers, flat beds and slide axles, this ladder mounts easily under your bed. To use, simply unhook the locking pin, guiding the ladder down the side channel slide to the working position. When the job is complete; reverse the action to simply stow & go with ease. The ladder is recessed under the trailer to eliminate collision with rear docks. Once you install your **Under Trucker Ladder**, you'll wonder how you ever survived without this ladder under your bed.

INNOVATIVE ACCESS SOLUTIONS

UNDER TRUCKER LADDER

ANSI A14.7-2011 – Special Duty (400-lb.)

SIDE MOUNT FEATURES

- **Top-Tier ANSI Rating (400-lb.) and OSHA approved construction**
